ENGR. UMAIR GHAFFAR

Senior .NET Desktop Application Developer

ghaffar.umairrr@gmail.com | +92 313 6305468 | +92 303 6736360 | Islamabad, Pakistan

PROFESSIONAL SUMMARY

Experienced .NET Application Developer with 5+ years of expertise building robust Windows desktop applications across oil & gas, healthcare, cybersecurity, and marketing industries. Currently designing geophysical interpretation software at LMKR using WPF/MVVM and Telerik for WPF, with hands-on experience in seismic data visualization, well log interpretation, and SEG-Y data processing. Proven track record in POS systems, MDM solutions, healthcare management systems, and IoT applications. Strong background in database design, API integration, and PowerShell automation with experience in AI model training and video processing technologies.

PROFESSIONAL EXPERIENCE

Application Designer CURRENT

LMKR (Landmark Graphics Resources)

Islamabad, Pakistan

February 2025 – Present

- Designing and developing geophysical interpretation software for the oil & gas industry using WPF and MVVM architecture
- Building advanced visualization tools for SEG-Y seismic data, 2D seismic sections, and 3D geovolume rendering
- Developing well log interpretation modules supporting LAS files, formation data, curve files, and stratigraphic interval analysis
- Implementing high-performance rendering pipelines for large seismic and well log datasets using GPU-aware techniques
- Integrating Telerik for WPF components for geological curve displays, log track views, and interactive 2D/3D panels
- Collaborating with geoscientists to design workflows for horizon picking, seismic-well correlation, and depth-to-time conversion

Windows Product Developer

Pligence

Lahore, Pakistan

September 2024 – January 2025

- Developed comprehensive Windows MDM (Mobile Device Management) solution for enterprise cybersecurity
- Implemented PowerShell scripting and automation for Windows-based management workflows
- Designed desktop applications for device monitoring, policy enforcement, and security compliance
- Created automated deployment and configuration systems for enterprise environments

Senior .NET Developer
Code 5 - Iboothme | Noonah
Lahore, Pakistan
September 2023 – August 2024

- Developed audience-engaging desktop applications and IoT solutions using C# and .NET Framework
- Trained and integrated AI models for 3D avatar content generation and animated picture processing
- Implemented video processing solutions using FFmpeg and Stable Diffusion for marketing content
- Built desktop applications for AI-powered content creation and automated video generation workflows

.NET Developer
TECH ANDAZ SMC PVT LTD
Lahore, Pakistan
July 2022 – September 2023

- Developed MealMinion POS system for restaurant chain management using C# WinForms and MS SQL Server
- Created Kitchen Display System with real-time order processing and inventory management
- Implemented print servers and socket servers for multi-location restaurant operations
- Designed responsive desktop interfaces with advanced reporting and analytics features

Manager HMIS & Software Developer
Bakhtawar Amin Memorial & Trust Hospital & Colleges
Multan, Pakistan
December 2020 – July 2022

- Developed comprehensive HMIS modules for accounts, reception, and laboratory operations
- Integrated lab machines using HL7 and HLSM protocols for automated data exchange
- Created Dr. Digital Prescription system with automated prescription generation and management
- Implemented Qmatic display hardware and software solution for patient queue management
- Managed biometric attendance systems and developed database backup and recovery policies

Junior Software Developer
Titans Coder
Multan, Pakistan
March 2020 – December 2020

- Developed desktop applications using C# .NET Framework and Windows Forms
- Created database-driven applications with MS SQL Server integration
- Implemented REST API integrations and JWT token authentication systems

EDUCATION

Bachelor of Science in Computer Engineering
University College of Engineering & Technology, Bahauddin Zakariya University, Multan
October 2016 – November 2020 • CGPA: 3.69 / 4.00

TECHNICAL EXPERTISE

Programming Languages & Frameworks: C#, VB.NET, .NET Framework, .NET Core, ASP.NET, WinForms, WPF, MVVM, Entity Framework, ADO.NET

Geophysical & Oil & Gas: SEG-Y Seismic Data, LAS Well Logs, Horizon Picking, Seismic Visualization, Well Log Interpretation, Telerik for WPF, 2D/3D Geovolume Rendering, Depth-to-Time Conversion

Database Technologies: MS SQL Server (2008/2012/2019), MySQL 8.0, Crystal Reports, LINQ, Database Design

AI & Automation Tools: Stable Diffusion, FFmpeg, AI Model Training, PowerShell Scripting, Automation

Web Technologies: HTML5, CSS3, JavaScript, REST API, JWT Authentication, JSON, Razor Pages

Development Tools & Methodologies: Git, JIRA, ClickUp, Agile Development, Version Control, Code Review

Specialized Protocols: HL7, HLSM, IoT Integration, Socket Programming, Print Server Management

KEY PROJECTS

Geophysical Interpretation Platform

WPF/MVVM desktop application for seismic data visualization, well log interpretation, and stratigraphic analysis with 2D/3D rendering — LMKR

Windows MDM Solution

Enterprise-grade Mobile Device Management system with PowerShell automation and policy enforcement

MealMinion POS System

Complete restaurant management solution with kitchen display and inventory tracking

Dr. Digital Prescription System

Automated prescription generation with integrated patient management and reporting

AI-Powered Content Generation

Desktop applications for 3D avatar creation using Stable Diffusion and video processing

HMIS Laboratory Integration

HL7/HLSM protocol implementation for automated lab equipment data exchange

IoT Smart Solutions

Order booking smart table and QR-based attendance management systems

KEY ACHIEVEMENTS

Geophysical Software Design

Delivering enterprise-grade seismic interpretation tools at LMKR with high-performance WPF/MVVM architecture for oil & gas workflows.

Healthcare Innovation

Developed comprehensive HMIS with HL7 integration, reducing manual data entry by 60% and improving patient care efficiency.

AI Integration Excellence

Successfully integrated AI models for content generation, reducing production time by 40% while maintaining quality standards.

INDUSTRY EXPERIENCE

Oil & Gas / Geophysics

Seismic interpretation software, SEG-Y data visualization, well log analysis, 2D/3D geovolume rendering, stratigraphic interpretation tools

Healthcare & Medical Colleges

HMIS development, prescription systems, lab equipment integration, patient management

Cybersecurity

MDM solutions, data leak prevention, security compliance automation, enterprise security

Food & Hospitality

POS systems, kitchen management, inventory tracking, multi-location restaurant operations

Marketing & Media

AI content generation, video processing, audience engagement tools, 3D avatar creation
